

## Product Data

### Castrol Rustilo DW 904™ De-Watering Corrosion Preventive

#### Description

*These are soft film, solvent deposited, water displacing type, corrosion preventives. These fluids can be applied directly to water wet metal surfaces, where they displace water, leaving a protective film. All these fluids have excellent spreading and they can be applied either by dipping or by spraying. The protective films of all these grades can be removed by wiping off with rags/waste soaked in kerosene/mineral turpentine or by alkaline degreasants or solvent degreasing methods. Rustilo DW 904 comply to IS: 1154 specifications.*

#### Application

*This grade is used for protection of components (viz. fasteners) which are to be subsequently wrapped in paper. It is also used as interoperational protective for removal of soluble oil emulsions.*

*These are water displacing, thin film type corrosion preventives.*

*Rustilo DW 904 is recommended for protection of components which are to be subsequently wrapped in paper.*

#### Characteristics

Characteristics	Typical Value
Appearance	Amber, clear fluids
Specific gravity@30°C	0.830
Flash point °C	40
Protection –Indoors	1/2 month
Outdoors	-
Coverage (sq.mt./ltr)	50-60
Film thickness (microns)	4-6
Water displacement test as per IS: 1154	Passes

*These are typical figures and do not constitute a specification.*
