VALONA 2140 S

Chlorinated Oil for Moderate Machining.

APPLICATIONS

- VALONA 2140 S is a clear, chlorinated, moderate duty cutting oil, formulated with extreme pressure (EP) and boundary lubricants to provide superior machining and lubricating performance.
- VALONA 2140 S is used on all operations on ferrous and non-ferrous metals: low
 carbon steels, stainless steel alloys, hard and very hard steels (bearing steels), on
 tensile steels, on copper alloy metals, and on brass.
- Operations include: sawing, cutting, milling, drilling, and other moderate duty applications using ferrous or non-ferrous metals.

ADVANTAGES

- Very good extreme pressure performance due to the chlorine.
- Increases tool life, prevents ridging, promotes good surface finish.
- Excellent lubricity properties--Increases the tool life on a large scale of cutting parameters maintaining an additive layer on the chip / workpiece / tool surface.
- Handles a broad spectrum of metals.
- · Excellent metal wetting ability.
- Anti-weld agent.
- · Non-staining.

TYPICAL CHARACTERISTICS	VALONA 2140 S
Appearance	Bright Clear Liquid
Color, ASTM D-1500	1.0
Viscosity at 40°C, cSt	28.8 - 35.2
Density @ 60 °F, lbs./gal.	7.44
Specific Gravity @ 60/60 °F	0.893
Flash Point, COC, °F	370
Copper Strip Corrosion	1A-1B
Sulfur Content, %wt.	Nil
Chlorine Content, %wt.	2.6
