

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

VALVOLINE CARB & THROTTLE BODY CLEANER

- Restores maximum power and performance
- Smooths rough idle and surging
- Removes gum, varnish, sludge and carbon deposits instantly
- Meets current low VOC regulations

Valvoline Carb & Throttle Body Cleaner is a premium formula which contains a blend of effective cleaners to help restore engine efficiency and reduce gasoline consumption by quickly dissolving gum, varnish, sludge, grease, dirt and carbon deposits from carburetor throats, chokes and PCV valves. This fast action formula also quickly removes deposits from throttle plates and its sealing area. Its quick penetrating formula will clean hard to reach clogged passages and surfaces. Meets current low VOC regulations. Safe for oxygen sensors and catalytic converters.

Equipment coated with gum, varnish, carbon or dirt becomes sticky and inefficient. Sluggish chokes and throttle linkages increase fuel usage and harmful emissions. Deposits coating the inside of a throttle body can cause rough idling, hesitation and surging. Sticky PCV valves can cause excessive oil consumption. **Valvoline Carb & Throttle Body Cleaner** safely removes these deposits without using harmful chlorinated solvents.

With the engine off, disconnect the air duct from the throttle body. Spray the throttle plate and inside throttle body with **Valvoline Carb & Throttle Body Cleaner**. Open throttle plate and clean sealing area. Wipe dry with a soft cloth. Reattach air duct. For large open areas, simply hold can upright 4-6 inches from part to be cleaned and spray.

Technical Data:

Appearance	Clear Liquid
Specific Gravity	0.813 @ 60°F
Flash Point, TCC	<0°F (liquid)
